ChannelConnect is the knowledge platform for IT service providers with an SME focus. We provide news, backgrounds and insights about SMEs so that IT service providers such as MSPs can understand and serve their end customers even better.

We deploy several channels for this purpose. The main pillars are our website ChannelConnect.nl with 20,000 visitors and our print publication ChannelConnect, which is published four times a year. The magazine has 7,000 subscribers.

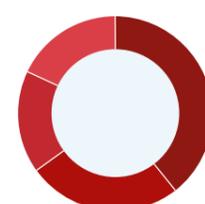

ChannelConnect deliberately opts for an **inbound content strategy**. We create content that clearly shows the problem for which your product or service is a solution. This way we respond to real needs and interests. We focus on the IT service provider, and especially the MSP, with mainly SMEs as its customers.

Where do they work?

We 'connect' and inform as many parties as possible in the IT channel so that the end user is optimally served. In addition to the essential industry news from the IT profession, we look at our content with an SME lens. Always based on the question: how do we help vendors, distributors and resellers to tailor their proposition as best as possible to the IT challenges of SMEs?
